

About:

This is P.Thanusha from 3rd team. I am currently pursuing my B.Tech at KSRM College of Engineering at CSE stream with this CGPA of 8.68. I am skilled in C programming, Python and Java.

The reason of joining here is to gain knowledge on real-time projects that give me hands on experience, and improvement of my skills in a real-world context. I am enthusiastic about the prospect of contributing meaningfully to the projects I engage with. Excited to embrace challenges and collaborate with team members to achieve shared success.

Internship:

I have completed my internship on Advanced data science. By this internship I have experienced in applying statistical analysis and machine learning techniques to real-world datasets. In this internship, I have improved my proficiency in languages like Python , tableau and numpy.

My objective:

I am extremely eager to broaden my skill set, particularly in the realm of Python frontend development. My enthusiasm lies in embarking on a project that harmonizes cutting-edge design, user-centric interfaces, and flawless functionality. Through this initiative, I aim to immerse myself in hands-on experiences, utilizing Python frameworks and libraries to craft dynamic and responsive web applications. The overarching objective is to cultivate a profound comprehension of contemporary frontend development practices, fostering both innovation and practical expertise in this dynamic field.
